

What is happening with STREAM at St. Louise?

In this first year of our STREAM initiative, we have made updates to our Language Arts, Technology and Science programs at St. Louise. As part of our new Science curriculum, students have access to a digital path as well as classroom experiment kits that encourage teamwork and collaboration. Our new Language Arts curriculum provides a digital path for students including interdisciplinary projects. Thanks to our generous donors, we were able to add 20 iPads, 20 Kindles, 2 Chromebook Carts, a 1:1 Chromebook initiative for 8th grade, 2 Sharp Aquos Boards, Little Bits, Spheros, and MakeyMakey. We are slowly adding to our collection of programming and robotic experiences for our students. Our STREAM initiative will continue next year with the creation of a MakerSpace and an upgrade to the Computer Lab.
